Art Unit: 2891

The terminal disclaimer filed on January 3, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of Patent No. 6,593,719 has been reviewed and is accepted. The terminal disclaimer has been recorded.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2, 8-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Torii – US 2003/0022422.

Torii (Figs. 12-17 and paragraphs 178-185) discloses the claimed invention by removing the n-type polysilicon to create a recess, removing the first gate dielectric layer 11, forming a second high gate dielectric 71, and filling the recess with a Al metal gate material 73. It is inherent (and a property of the Al metal) that the Al metal gate is n-type, because applicant's specification has Al as an n-type metal gate material.

Art Unit: 2891

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3-7 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Torii – US 2003/0022422.

Torii (Figs. 12-17 and paragraphs 178–185) discloses substantially the claimed invention as above, and does not disclose the specifics of the wet etching, nor using a silicon germanium alloy. However, Torii does state using wet etching, and it is clearly within the level of ordinary skill in the art to optimize the etching parameters to efficiently remove the n-type gate material `with reduced defects. It is also within the level of ordinary skill in the art to use a silicon germanium alloy for the device resistance and activation characteristics required.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the claimed wet etching parameters and a silicon germanium alloy as discussed above.

The terminal disclaimer has been approved, and the double patenting rejection has been withdrawn. New rejections have been applied based on the IDS submitted October 12, 2005 as above.

Art Unit: 2891

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chandra Chaudhari whose telephone number is 571-272-1688. The examiner can normally be reached on Mon - Fri (9:00-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bill Baumeister can be reached on 571-272-1722. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
